## Computer Science Curriculum Overview

### Why Teach COMPUTER SCIENCE?

We believe that Computer Science is a vital subject for pupils to learn within the modern world, where computing and technology are embedded in everyday life. By learning Computer Science learners will study:-

- How to recognise online dangers and stay safe within the online world
- How computers work
- How they are programmed
- Computational thinking skills they can use in many other areas
- How to use key programs to present and share work
- Understand how digital technology is vital for modern careers

### Disciplinary Big Ideas

Within Computer Science we develop learner's disciplinary knowledge by the following techniques to help build their ability to fully apply the substantive knowledge.

Good Online Practices	
Computer Programming	
Computer Systems and Networks	
ICT Literacy	

### The Big Substantive Ideas of the Computer Science Curriculum

Curriculum maps detail the sequencing of substantive knowledge from Computer Science to enable pupils to build schemata of important concepts over time through 4 'big ideas'.

Programming	
E-Safety	
Technology	
Data	

### Learning for Life and Careers

#### Employability skills

Learning to program builds characteristics such as collaboration, communication, creativity, critical thinking, and resilience. Additionally, this subject develops numeracy and literacy, presentation skills, and the ability to analyse and evaluate

#### Linking the curriculum to careers

Careers in computing, engineering, IT, data management and security.

#### Examples of qualification pathways

At KS4 we offer the BTEC Tech Award in Digital Information Technology (DIT) as well as the GCSE Computer Science course and offer A level Computer Science at KS5. BTEC Tech Award in Digital Information Technology (DIT) progresses well to the Level 3 Extended Certificates, which in turn progresses well to study at Higher Nationals. The Computer Science GCSE progresses naturally to the Computer Science A level or professional qualifications such as CCNA, which in turn can lead to further study at degree level.

## Computer Science Curriculum Map by Term

	Programming	E-Safety	Technology		Data		
	Year 7	Year 8	Year 9	Year 10	Year 11	Year 12	Year 13
Autumn 1	Computer Usage	E-Safety	E-Safety	Data storage-Numbers Computational thinking Designing, creating and refining algorithms	Architecture - CPU Performance	Programming basics: Selection, Iteration, Arrays, Subroutines, Files, Exceptions Computational Thinking Structured programming Algorithms Testing Abstraction, Automation	Databases, ERDs, Normalisation, SQL Project skills – SQLite Systemic approach Data structures – Queues, Lists, Stacks, Hash tables
	E-Safety	Games Programming in Scratch	Hardware review & I/O devices Websites & HTML	Programming fundamentals: Intro & Review Data types Programming fundamentals: Sequence & Selection	Data storage-Images Data storage-Sound Data storage-Compression		Communications methods Network topologies Client-server and a peer-to-peer networks Wireless networks Communications & privacy
Autumn 2	Kodu – an introduction to programming	Games Programming in Scratch	Websites &	Programming fundamentals: Selection Programming fundamentals: Iteration - Count Programming fundamentals: Iteration - Condition	Embedded Systems Memory Storage	Finite state Machines Social, legal and cultural issues	Data structures – Graphs, Trees, Vectors
			HTML Python Review				Recursion
Spring 1	Kodu – an introduction to programming	Scratch Project	Intermediate Python	Additional programming - Arrays Additional programming techniques - Sub programs	Internet / WWW LANs Wireless Client-server and a peer-to-peer networks	Hardware & software Operating systems, Language classification, Translators Logic gates, Adders, D-type flip-flops Boolean algebra Computer Architecture	Limits of computation Sets, Regular expressions, Mealy machines, Turing machine
Spring 2	Computer System Basics	Introduction to programming in Python	Intermediate Python	Data storage-Characters Additional programming techniques - String manipulation Additional programming techniques - File Handling	Protocols Network threats Preventing vulnerabilities	CPU, Instruction sets Assembly Language OOP basics OOP Design Principles	BNF, Reverse Polish The internet, packet switching, routers
			Office Skills - Spreadsheets	Functional programming Big Data			
Summer 1	Computer System Basics	Introduction to programming in Python	Office Skills - Spreadsheets, Presentations	Searching - Binary & Linear Sorting - Merge & Insertion Additional programming techniques - Record/SQL Defensive design Testing Languages Boolean logic	Operating Systems Utilities	I/O devices Secondary storage Communications methods Network topologies Client-server and a peer-to-peer networks	Network security TCP & protocols IP addresses Client-server model
Summer 2	Office skills- Spreadsheets	Computational Thinking	Office Skills – Presentations, Word Processing	Ethical, legal, cultural and environmental impact		Wireless networks Communications & privacy	Project introduction Project skills – TK, Pygame
				Languages The Integrated Development Environment (IDE)

Year 7	Year 8	Year 9	Year 10	Year 11	Year 12	Year 13	
<ul style="list-style-type: none"> <li>Learn about computer system basics</li> <li>Understand key hardware components, what they do and how they link together</li> </ul>	<ul style="list-style-type: none"> <li>Understand the difference between the internet and the world wide web</li> </ul>	<ul style="list-style-type: none"> <li>Understand what a web page is and what web-servers are</li> <li>understand websites are written in HTML</li> <li>understand the basic features of HTML, such as tags, head, body and create simple web pages</li> <li>Know modern pages are formatted using Cascading Style Sheets</li> </ul>	<ul style="list-style-type: none"> <li>Understand how data is represented in a computer and it's impact on programs, such as data types</li> </ul>	<ul style="list-style-type: none"> <li>Understand the architecture of a computer, especially the CPU, it's key components, such as registers and cache, and how they affect system performance</li> <li>Understand the different memory types of RAM &amp; ROM</li> <li>Understand the need for and the different types of storage – magnetic, solid state and optical and choose the appropriate one for specific scenarios</li> <li>Understand network types e.g. LAN/WAN or C-S/P2P and recommend appropriate use</li> <li>Understand the issues of network threats and use appropriate techniques to prevent vulnerabilities</li> </ul>	<ul style="list-style-type: none"> <li>Understand Hardware &amp; software</li> <li>Describe Operating systems, Language classification &amp; Translators</li> <li>Work with Logic gates, Adders, D-type flip-flops for specific scenarios</li> <li>Use Boolean algebra to rearrange or simplify expressions</li> <li>Know Computer Architecture</li> <li>Be able to describe in detail the specifics of certain I/O or secondary storage devices</li> </ul>	<ul style="list-style-type: none"> <li>Choose the appropriate network topology and components for different situations</li> <li>Understand how the internet works with packet switching and routers</li> <li>Understand the issues of network security and use appropriate techniques to prevent vulnerabilities</li> <li>Understand the need for protocols and the TCP/IP stack</li> <li>Know how IP addressing works and use subnet masks to create subnets for specific situations</li> </ul>	
<ul style="list-style-type: none"> <li>Learn the basics of spreadsheets</li> <li>Be able to use simple and intermediate spreadsheet formulae and functions</li> <li>Create graph/charts</li> </ul>		<ul style="list-style-type: none"> <li>Further develop Office skills</li> <li>Learn about Presentation techniques</li> <li>Learn how to create Presentations that are fit for purpose</li> <li>Learn Word Processing techniques</li> <li>Be able to use intermediate and advanced spreadsheet formulae and functions</li> <li>Create documents of appropriate type and content</li> </ul>	<ul style="list-style-type: none"> <li>Use key programming techniques to begin to create their own programs</li> <li>Use appropriate programs to create and organise resources</li> </ul>	<ul style="list-style-type: none"> <li>Use key programming techniques to begin to create their own programs</li> <li>Use appropriate programs to create and organise resources</li> </ul>	<ul style="list-style-type: none"> <li>Use key programming techniques to begin to create their own programs</li> <li>Use appropriate programs to create and organise resources</li> </ul>	<ul style="list-style-type: none"> <li>Develop their own app or program to fill the needs of a specific user</li> <li>Cite references for research they have used</li> </ul>	

# Prince William School COMPUTER SCIENCE Key Vocabulary

	Year 7	Year 8	Year 9	Year 10	Year 11	Year 12	Year 13
Autumn 1	Computer Usage, E-Safety	E-Safety	E-Safety, Hardware – I/O	Data storage-Numbers, Programming fundamentals:	Boolean logic, Data representation	Programming Basic, Computational thinking	Databases, Data structures
	Organisation	Internet	Grooming	Place value	Boolean	Exceptions	Wireless / Wi-F-
	Files	World wide web (WWW)	Extremism	Denary / decimal	Operators / gates / circuits	Imperative	NIC
	Folders	Searching	Radicalisation	Binary	Truth table	Declarative	CSMA/CA and RTS/CTS
	Cyber-bullying	Source	Rights	Hexadecimal	Units	Abstraction	SSID
	Social networking	Reliability	Responsibilities	Sequence	Characters	Algorithm	Whitelist
	Personal data	Cross-check	“Upskirting”	Data type / casting	Images	Modelling	Prototype
	Trusted adult	Grooming	CPU	Variables	Sound	Automation	Waterfall
Outcome	Sexting	I/O Devices	Input / output	Compression	Decomposition	Queues, Lists, Stacks, Hash tables	
Autumn 2	Kodu	Programming in Scratch	Websites- HTML, Python review	Programming fundamentals:	Standard algorithms, Impact	FSM, Impact of Computers, Data representation	Data structures, Algorithms
	Program	Sprite	Web server	Selection	Algorithm	Finite State Machine	Graphs, Trees, Vectors
	Precise	Costumes	HTML	If / else / elseif	Searching – linear / binary	Start / End state / Transition	Recursion / recursive
	Sequence	Movement	Tags	Boolean operator	Sorting – bubble / insertion / merge	Legislation	Stop / base case
	Landscape	Co-ordinates	Head / Body	Case	Ethical	Number bases	Traversal
	Navigation	Sequence	CSS	Count-controlled Iteration	Legislation	Floating point / Normalisation	Pre / in / post-order
	Automatic	Selection	Variables	For	Cultural	Bit depth	Time complexity
	Manual	Lives	Sequence	Condition-controlled Iteration	Environmental	Resolution	Polynomial
Clones	Variables	Comment	While	Impact	Run length encoding		
Spring 1	Kodu	Scratch	Python Intermediate	Programming fundamentals:	Systems Architecture, Networks, Connections & Topologies	Computer Architecture	Algorithms
	Creatables	Iteration	Selection	Array	Von Neumann	Hardware	Tractable
	Scoring	Procedures (Broadcasts)	If	Index	ALU / CU / MAR / MDR / PC / ACC	Software	Heuristic
	Selection	Randomisation	Else	Length	Primary / secondary storage	OS	Computable / non-computable
	Indentation	Interaction	Elseif	Append	LAN / WAN	Bespoke / Off-the-shelf	Functions / composition
	Pages	Sounds	Indentation	Subroutine	Ethernet / wireless	Gates	Domain / co-domain
	Depth	Criteria	Iteration	Procedure	Client server / Peer-to-peer	Boolean	First-class objects
	Complexity	Testing	For	Function	Topology	Adders	Regular language
Objectives	Evaluation	Range	Return	DNS / Cloud	Flip-flop	Universal Turing Machine	
Spring 2	Computer System Basics	Programming in Python	Python Intermediate, Office Skills - Spreadsheets	Programming fundamentals:	Protocols and Security	Computer Architecture, OOP	
	Computer	IDE	While	String	Encryption	Machine code	Backus-Naur Form
	Input	Syntax	Condition	Character	IP / MAC addresses	Assembly language	Revers Polish notation
	Process	Sequence	Counter	Concatenate	TCP/IP, HTTP, FTP, POP, IMAP, SMTP	Object	IP address v4 / v6
	Output	Debugging	Array	Slice	Layers	Class	Domain Name System
	Memory	Parentheses	Formula	File	Malware	Instantiation	Internet Registries
	Storage	Variables	Relative / Absolute	Open / Close	Brute-force / DOS / SQL injection	Inheritance	Routing table
	CPU	Data types	Function	Read	Anti-malware Software	Polymorphism	Packet switching
Random Access Memory (RAM)	Integer	Nested	Write	Firewall	Overriding	Packet header / trailer	

# Prince William School

## COMPUTER SCIENCE Key Vocabulary

	Computer System Basics	Programming in Python	Office Skills - Presentations	Programming fundamentals:	Software	Computer Architecture	
Summer 1	Heatsink	Float	Presentation	Defensive design	Operating system (OS)	Register	Firewall
	Fan	String	Slide	Authentication	User Interface (UI)	Cache	Symmetric / asymmetric encryption
	Motherboard	Input	Layout	Validation	OS functions	Bus	TCP/IP protocol stack
	Power supply	Arithmetic operators	Design	Record	Utility Software	I/O device	Ports
	Hard disk drive (HDD)	Selection	Object	SQL – Select, From, Where	Encryption	Primary / Secondary storage	Subnet mask
	FDE Cycle	If	Master slide	Testing – iterative & final	Defragmentation	Optical	DHCP / NAT
	Hz, MHz and GHz	Indentation	View	Test data–normal, boundary, invalid	Data Compression	Magnetic	WebSocket
	Instructions	Else	Organise	Syntax and Logic errors		Solid State	CRUD / REST / JSON / XML
Summer 2	Spreadsheets	Computational Thinking	Office Skills – Word processing	Languages		Wireless networks, Project	
	Data	Abstraction	Word processor	High & Low level languages		Entity	
	Cell	Decomposition	Paragraph	Translators		Attribute	
	Row	Computational Thinking	Section	Compilers		Tuple	
	Column	Objectives	Break	Interpreter		Relationship	
	Formula	Flow chart	Format	IDE		Normal form	
	Function	Testing	Layout	Editor		Key	
	Relative / Absolute	Algorithm	Mail merge	Diagnostics		NEA	
Graph / chart	Variable	Review	Run-time environment		Deadline
